Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 1-20, 38 and 39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/15/08.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21, 23, 24, 30 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Pack (6148769). Pack discloses a method of aquaculture, comprising: growing a photosynthetic first species or microalgae in a first tank, water in the first tank having a first water chemistry based on the contents therein; providing the first species to a second species or live food animals in a second tank that eats the first species, water in the second tank having a second water chemistry different from the first water chemistry based on the contents therein; and providing the second species to a fry in a third tank, wherein the third tank has a water chemistry different from both the first and second water chemistries due to their respectively distinct contents; and wherein a water transfer device (84) is enable to transfer water between the third and first tanks (col. 3, lines 50-53).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pack ('769) in view of Droese et al. (4213421). Pack teaches that the first species is microalgae. Droese et al. teach a cultivation system which breeds plankton species (which is considered to be a non-floating plant) which offer food to sea-water creatures. It would have been obvious to one skilled in the art to use plankton as the first species in the Pack system as Droese et al. teach it is known plankton compositions provide natural protein and nutritional supplement to fish.
6. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pack ('769). Although it is not disclosed that the fish is a sturgeon, it would have been obvious to one of ordinary skill in the art to use the culture system and method of Pack to cultivate other species depending upon the commercial or ecological need.

Allowable Subject Matter

7. Claims 22, 25-29, 31, 32, 34 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
